WEST BROAD VILLAGE: HOW THIS DEVELOPER SAVED MILLIONS OF DOLLARS BY TRUSTING A BETTER DESIGN

When developing a project, every owner must carefully weigh the costs of design, but also consider if their design is indeed the best economic opportunity for the project. Luckily, Unicorp National Developments brought FINFROCK into the planning phase for West Broad Village, a premier million SF village center located in the heart of Richmond, VA that included the construction of 4 parking garages.

Creating a lasting relationship with Unicorp, FINFROCK saved the owner significant projects costs by reworking the master plan created for West Broad Village. In the original plan, the site was designed around existing utilities that were thought to be too expensive to move; the adverse

effect being that the owner was about to unknowingly spend 10x the relocation amount by building inefficient structures in hopes of avoiding the much lower cost of the utilities. With FINFROCK acting as both design-builder and economic consultant, our expert teams redesigned the project, also collaborating with the overall architecture team to blend the look of the wood-frame apartments that surrounded the garages.

In turn, the redesign improved efficiency creating **significant savings for the project in excess of \$10M.**

In this impressive project, FINFROCK acted as the architect of record, engineer of record, and General Contractor for the garage portions of West Broad Village.

GET YOUR PARKING OFF THE GROUND WITH FINFROCK.

If you've considered building structured parking for your development, you want one team to handle the job. As the #1 Design-Builder of parking garages in the United States, FINFROCK is the one company that provides a single source of responsibility for the entire process. With turnkey in-house capabilities, our teams design structures for maximum site efficiency, create award-winning architecture details, manufacture the precast components to exact tolerances, and build the garage with an accelerated schedule to benefit your overall development.

When you work with FINFROCK, you not only receive a guaranteed price and schedule prior to hiring our team, but you gain the experience of our planners who are code experts. Our teams work to arrange the permitting timeframe to be as fast as possible avoiding unnecessary costs and risks. FINFROCK's parking specialty allows the remainder of your design and construction teams to **focus on the main event while we focus solely on the parking.**

When you choose to build a parking garage, you're assured that FINFROCK will handle all the details. Because of FINFROCK's advanced planning and vertical integration, our garages can be delivered faster than any other method, getting out of the way of construction and logistics for the main event.

ALTA RIALTO

TAKING YOUR DESIGN FROM FLIGHT TO PROFIT:

As a newer wood-frame luxury apartment development, The Alta Rialto Apartments in Orlando, FL were in search of a construction partner to bring their attached parking structure to life. With the economic expertise of our project development teams, **FINFROCK saved the owner significant projects costs** by reworking the original parking structure design for maximum economic efficiency.

Surrounded by the wood-frame apartments on three sides, our project teams were able to collaborate with the adjacent architect and blend the façade seamlessly with the apartments, even installing windows and blinds on the garage to provide apartment style feel in the garage. Throughout the construction phase, garage specialty subcontractors were managed by FINFROCK to lower the overall cost of the project. By utilizing FINFROCK's advice to take the garage off the critical path earlier in the project, the construction time for this development was greatly reduced.

FINFROCK served as architect, structural engineer, precast/prestressed concrete manufacturer, general contractor and parking consultant on the 392-stall, five elevated-level parking garage.

FINFROCK's parking specialty allowed for the remainder of the developer's design and construction team to focus on the main event while still receiving an exceptional parking structure.

MIDTOWN MEGADECK

THINK BIG: PARKING TO MATCH THE SCALE OF YOUR PROJECT

FINFROCK is known for working hand-in-hand with general contractors and other architects to handle the parking for their projects. That's why Bromley Companies and Barr & Barr Construction selected FINFROCK as the design-builder for MidTown Megadeck, a standalone garage with 1,250 spaces that spans across six-stories, supporting the new 1.8 million sq.ft. hotel-retail-housing development for MidTown Tampa, located in Tampa's flourishing WestShore District.

One of the biggest advantages to working with FINFROCK's project teams are the savings found in the initial construction and planning requirements. During the design phase of MidTown Megadeck, a shared parking analysis allowed the development to take advantage of peak time usage between different user groups to lower the overall parking requirement. As one large common parking structure provided a more functional and economical solution for the parking, the benefits of working with FINFROCK's team also manifested in the form of **rapid construction delivery, site efficiency, and plans for future expandability** to up to 2,370 parking spaces. This plan limited initial capital requirements while leaving the door open for future development in an economical manner.

With years of experience of sharing sites with other contractors, FINFROCK delivered this garage while the construction of the other buildings was implemented and collaborated with 2 other architects, 2 civil engineers, and 2 other general contractors.

WHY BUILD WITH FINFROCK?

From parking garages to apartments to hotels –FINFROCK handles every step of the building process. With our team of award-winning architects, engineers, manufacturing crews and construction experts, **we guarantee a budget and schedule for your project** because the entirety of it rests in our hands. With our vertical integration and focus on modular construction, multiple disciplines can move forward at the same time. That means reduced risk, less cost, and a faster timeline to get your investment going.

For over 75 years, FINFROCK has been an industry-leading expert in large-scale design and construction with skilled professionals ready to handle every phase of your finished structure:

Our Project Types:

Luxury Apartments

Hotels

Student Housing

Office Buildings

Parking Garages

Our Scope of Work:

- Site Planning
- Architectural Design
- Structural Integration
- Signs and Wayfinding
- Precast Manufacturing
- Construction
- Subcontractor Management
- Operations and Maintenance
- Safety and Security
- Punch-list
- Certificate of Occupancy

WE MAKE IT EASY TO GET THE BUILDING YOU WANT

LESS RISK

FINFROCK has made the leap to incorporate the design, integration of sub-trades into the manufacturing of the structural components, and construction into one single source of responsibility for the customer. By doing so, we dramatically reduce your risk.

LESS COST

FINFROCK's in-house teams work with you as a partner from the onset, using your functional, aesthetic, and economic requirements to develop concepts that work within your budget. We provide a guaranteed price before the completion of design documents and compress schedules to give you predictable costs and on-time completion.

LESS TIME

As a vertically integrated company, FINFROCK is able to conduct work in multiple phases of a project simultaneously. With multiple disciplines moving forward at the same time, schedules are significantly compressed.
