Solutions

**MAKE YOUR NEXT
PARKING PROJECT EASY**
SIX STEPS TO SUCCESS

PARKING DOESN'T HAVE TO BE BORING

WHAT FINROCK CAN DO FOR YOU

FINROCK works with you as a trusted advisor to not only get you the parking you need, but an attractive design within your desired budget. You can enjoy reduced risk and reduced cost by dealing directly with the single-source responsibility of a fully integrated design-build company.

We do all design, manufacturing, and contracting in house, so we have constant feedback from all teams, as well as an exceptional database of cost information from previous projects. We deliver the best price upfront, both minimizing your opportunity cost and enabling you to prove the viability of your project sooner.

With FINROCK, you can make a realistic evaluation of your design very early in the project with little or no capital outlay. As a result, the usual process and expense of dealing with a loose alliance of separate design teams, contractors, and subcontractors, are eliminated allowing you to get the look you want at a price you expect.

FROM IDEAS TO REALITY

BETTER PARKING IS POSSIBLE

As a fully integrated design-builder, we understand the cost drivers, design standards, and construction details associated with the design and construction of cost-effective projects, which include structured parking. This understanding, teamed with our knowledge of manufacturing the structural components, allows us to develop early accurate budgets with relatively few owner-provided details. You may be concerned that a parking garage is out of the realm of reality for your project. We can show you how to make your ideas affordable.

SIX STEPS TO SUCCESS

GET WHAT YOU WANT WITH A GUARANTEED PRICE UP FRONT

If you can answer these six questions, FINFROCK can provide a guaranteed lump sum price for your project that also includes the design.

1 WHERE DO YOU WANT TO BUILD?

The available land, size of the lot, and the geometry of that space is the most important factor in the overall cost efficiency of structured parking. By understanding the size and shape of the available land, FINFROCK can design the most cost-effective structure possible that will not only fit but offer the best function for your available space.

2 WHAT IS YOUR WISH LIST?

Simply stated, “How many parking spaces are needed, and what will the parking serve?” In addition to parking stalls, are there any other requirements, uses, or occupancies within the structure? For instance, is retail space required at the ground level? Do you have other needs that require specific accommodations? Our team is equipped with solutions to meet your needs. Your challenges can be met affordably with the right design.

3 WHAT ARE THE ADJACENT STRUCTURES AND BOUNDARIES?

A full-blown site plan isn’t essential to conceptualize the parking structure in the early stages. However, we need to understand what other buildings will occupy the site and their approximate locations. For instance, we will take a slightly different approach for a parking structure surrounded by apartments than one which occupies an entire city block.

4 HOW DO YOU WANT IT TO LOOK?

Often, owners prefer that the exterior of their parking structure resembles adjacent or other finished buildings on site. Other times a less dressed, cost-effective structure will work just as well and fit within your desired budget. We are the architects, so we can bring your vision to reality. Our team will work with you to understand the level of aesthetics you require. Parking does not have to be boring.

5 WHAT ARE SITE CONDITIONS?

Project size and soil conditions dictate foundation types, which can be a significant cost driver. We work with your geotechnical engineer to ensure we design the most economical foundation for your project. If the report is not yet available, reports from previous projects on the site or nearby projects can be useful in determining the likely scope of the required foundation system.

6 DO YOU HAVE ANY ADDITIONAL REQUIREMENTS?

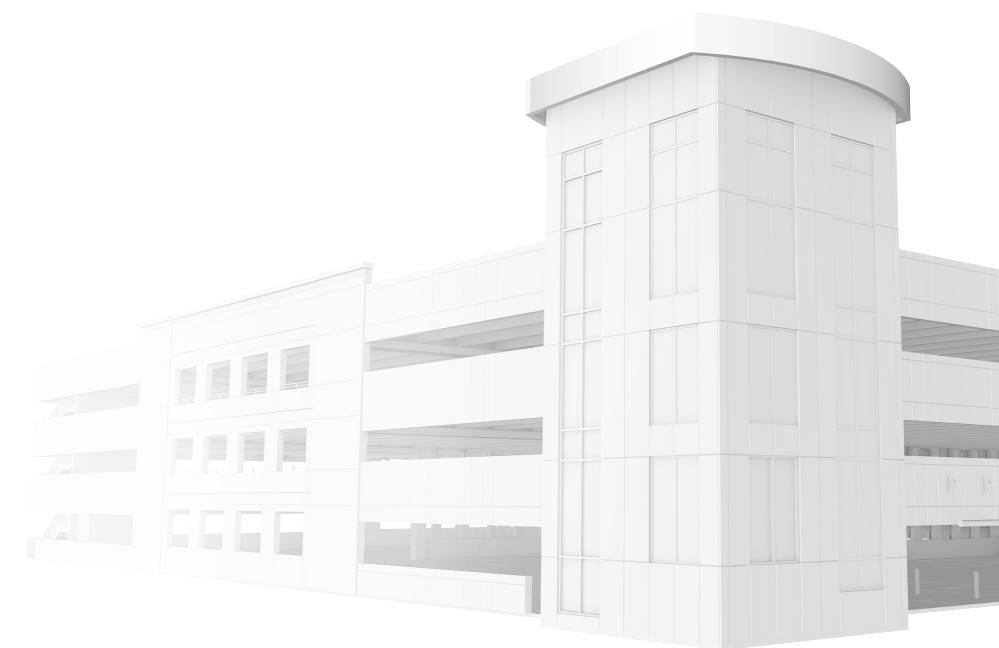

Additional requirements might be items such as access control, security, revenue control, parking guidance systems, other owner-specified finishes, additional program requirements due to adjacent buildings, utility tie-ins, project schedules, etc. The more refined the project-specific requirements become, the more refined your budget is. With information on each of the six criteria, FINFROCK can develop an accurate budget for your specific project.

MAKE YOUR PARKING DREAMS A REALITY

LET US GIVE YOU A GUARANTEED PRICE UPFRONT

Rather than rely on industry averages, contact us today or fill out our parking inquiry form at www.finfrock.com/parking, and we’ll give you an accurate budget. With over 300 successful parking projects, we are the largest design-builder of parking parking garages in the country. Because FINFROCK has in-house experience and cost knowledge in delivering your type of project, we help in the decision making process resulting in the best design for the best price.

WE MAKE IT EASY TO GET THE BUILDING YOU WANT

LESS RISK

FINFROCK has made the leap to incorporate the design, integration of sub-trades into the manufacturing of the structural components, and construction into one single source of responsibility for the customer. By doing so, we virtually eliminate your risk.

LESS COST

FINFROCK's in-house teams work with you as a partner from the onset, using your functional, aesthetic, and economic requirements to develop concepts that work within your budget. We provide a guaranteed price before the completion of design documents and compress schedules to give you predictable costs and on-time completion.

LESS TIME

As a vertically integrated company, FINFROCK is able to conduct work in multiple phases of a project simultaneously. With multiple disciplines moving forward at the same time, schedules are significantly compressed.
